■ EDUCATION

2013- present Undergraduate Student, Wuhan University

■ PERSONAL INFORMATION

With profound interests in designing new materials, especially which have the potential of fabricating high-speed integrated circuits to push the Moore's law forward, I chose to dive into the basics of materials, that is, chemistry, and joined Prof. Deng's Lab as an undergraduate research assistant. I hope to gain experiences in research and development of materials in this group.

I am the designer and developer of our group website.
